

14 August 2019

To whom it may concern:

Hereby the company Cerdak (Pty) Ltd as the manufacturer of the brand Cerdak Bio Ceramic wound dressings declares that it is not allowed to cut the dressings into customized sizes for the following reasons:

- The manufacturing process entails specific sealing dimensions that do not allow for customized cutting which could compromise the seal strength and could lead to spillage of the microporous spheres.
- Upon spillage of the microporous spheres the clinical effect of the dressing is compromised and the dressing should be discarded.
- Specified in user manual not to change dressing sizes.

Yours sincerely

JAA Kotze
